For the control of Spotted Lanternfly

USE SITE	PEST	RATE OF APPLICATION		
		Active ingredient lbs per acre	Fluid oz. per acre	Fluid oz. per 1000 sq. ft.
Outdoors on Landscape ornamentals and turf around residential, institutional, public, commercial, and industrial buildings, greenhouses, parks, recreational areas and athletic fields.	Spotted Lanternfly	0.05-0.1	10-20	0.25-0.5

DIRECTIONS FOR USE: The application rates listed in the table will provide control of the target pest under typical conditions.

Apply Talstar® Professional Insecticide to foliage and areas where pests are seen or known to harbor. Use application volumes of up to 10 gallons per 1000 square feet to get uniform coverage when treating dense and or long turf foliage.

In New York States, this product may NOT be applied to any grass or turf area within 100 feet of a water body (lake, pond, river, stream, wetland, or drainage ditch).

In New York State, do make a single repeat application of Talstar P Professional Insecticide if there are signs of renewed insect activity, but not sooner than two weeks after the first application.

Use Restrictions

- Apply with ground equipment only.
- Do not apply when wind direction favors downwind drift towards nearby water bodies.
- Do not apply when wind velocity exceeds 10 mph.
- Do not water treated area to the point of run-off.
- Do not make applications during rain.
- Firewood is not to be burned for one month after treatment.
- Do not allow people or pets on treated surfaces until spray has dried.
- Do not apply to pets, food crops, or sources of electricity.

ALL APPLICABLE DIRECTIONS, RESTRICTIONS, WORKER PROTECTION STANDARDS REQUIREMENTS AND PRECAUTIONS ON THE EPA-REGISTERED TALSTAR PROFESSIONAL INSECTICIDE, EPA REG. NO. 279-3206, LABEL MUST BE FOLLOWED. THE TALSTAR PROFESSIONAL SECTION 3 LABEL AND THIS RECOMMENDATION MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF PESTICIDE APPLICATION.
