

"I really can't say enough about Transport® Mikron®. It definitely reduces the number of products I need to do a good job."

Will White
Owner, Nexus Pest Solutions

THE PEST CONTROL YOU NEED, WHERE YOU NEED IT

With its flexible label, Transport® Mikron® insecticide provides fast-acting and long-lasting control of over 30 pests, including pyrethroid resistant insects. No matter what the job entails, Transport® Mikron® has you covered with proven effectiveness in residential or commercial spaces, interior or exterior environments and even food handling and commercial kitchen facilities.

PRODUCT ATTRIBUTES:

- Active ingredients: Acetamiprid and Bifenthrin
- Chemical Families: Neonicotinoid and Pyrethroid
- Clear spray eliminates visible residue often associated with other formulations
- Micro-emulsion formulation is more readily absorbed through an insect's cuticle for faster control
- Remains in suspension once mixed and does not require agitation before use, even after extended periods of non-use

LABELED PESTS:

- Bed Bugs
- Cockroaches
- Ants
- Over 25 other labeled pests

LABELED USE SITES:

- Food Handling Establishments
- Residential
- Commercial
- Perimeters
- Mattresses and Luggage

A CLEARLY UNIQUE FORMULATION

FMC has taken the powerful active ingredients found in Transport® GHP insecticide and harnessed them in a highly advanced Mikron® liquid formulation that's completely clear once mixed to avoid leaving residue behind. The unique micro-emulsion formulation of Transport® Mikron® features a particle size that is 100 times smaller than other emulsifiable products and thousands of times smaller than micro-encapsulated products for better insect penetration. The crystal-clear spray leaves no visible residue and creates a mixture that stays even for longer than comparable products.

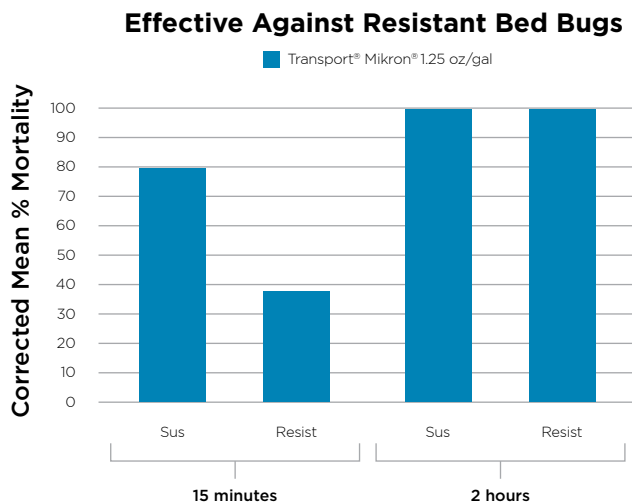

KICK BUGS OUT OF THE KITCHEN

Transport® Mikron® insecticide is approved for use as a spot or crack and crevice treatment in both food/feed areas and non-food areas of food-/feed-handling establishments, making it an effective tool for pest professionals with food service accounts.

- Controls common food-handling pests like flies, cockroaches and ants
- Approved for use in ultra-low volume spray equipment, including Actisol® and Micro-Injector®
- Can be applied in wall voids to target German cockroaches and other insects

PUT BED BUGS TO SLEEP

Labeled for direct applications to mattresses and luggage as well as treatment of dressers, bed frames, box springs, closet floors and carpet edges, Transport® Mikron® is a versatile component of bed bug management. Research has proven that the combination of active ingredients in Transport® Mikron® delivers effective results, even against pyrethroid resistant bed bugs.
