## **Totality® wood treatment from FMC is now registered in Florida** *Termiticide registered as a preconstruction wood treatment.*

**PHILADELPHIA, August 31, 2022** – FMC Corporation, a leading global agricultural sciences company, announced the registration of Totality® wood treatment in Florida. Totality® wood treatment enables Pest Management Professionals (PMPs) to improve the profitability of their preconstruction wood treatment programs.

The active ingredient in Totality® wood treatment, bifenthrin, is the same trusted active ingredient in Talstar® insecticide. The EC formulation and application efficiencies associated with Totality® increase productivity. PMPs will spend less time mixing and cleaning equipment as Totality® requires only one treatment versus two treatments with competitive products containing borate. Studies show Totality® wood treatment is effective at low use rates – 3.2 fl. oz. of Totality® per gallon of water.

Published university data indicates that bifenthrin provides effective termite repellency and mortality; bifenthrin kills termites at levels as low as <1 ppm in soil. Over 10 years of research shows that Totality® protects treated structures from subterranean termite attack for over five years after treatment.

“Totality® offers PMPs an effective termite treatment with a simplified application process,” said Allan Dufoe, FMC North American Sales Manager for Pest Control. “Reducing application time can deliver more to the bottom line.”

FMC is excited to incorporate this innovative solution into its strong insecticide portfolio. For more information visit [www.gss.fmc.com](http://www.gss.fmc.com) or contact 833-362-7722.

### **About FMC**

FMC Corporation is a global agricultural sciences company dedicated to helping growers produce food, feed, fiber and fuel for an expanding world population while adapting to a changing environment. FMC’s innovative crop protection solutions – including biologicals, crop nutrition, digital and precision agriculture – enable growers, crop advisers and turf and pest management professionals to address their toughest challenges economically while protecting the environment. With approximately 6,400 employees at more than 100 sites worldwide, FMC is committed to discovering new herbicide, insecticide and fungicide active ingredients, product formulations and pioneering technologies that are consistently better for the planet.
