SquareOne™

HERBICIDE

Give your turf the best beginning possible. Start with SquareOne™.

- ◆ Maintaining healthy turf begins with a successful seeding. Give newly-seeded turf the best start—sooner than ever before
 - Use for either spring or fall turf renovation projects, including interseeding & overseeding
 - Can be used on lawns, golf courses, sod farms, and athletic fields
- ◆ Combats crabgrass and many small broadleaf weeds that compete with new turf
 - SquareOne is labeled for control or suppression on over 60 different grassy and broadleaf weeds
- ◆ Can be applied up to 1 day before seeding or 7 days or more after emergence
 - Up to 6 weeks sooner than other products
 - Reduces weed competition early to enable a healthy stand of new turf
- ◆ Approved for use on most cool- and warm-season turf
 - Not for use on Bentgrass or St. Augustinegrass
- ◆ Features a dual action, optimized combination of active ingredients
 - Carfentrazone-ethyl & Quinclorac
 - Works primarily through foliar contact and uptake, but also continues to hold back weed competition until the new turf is established
- ◆ Dispersible granule formulation
 - Mixes easily in water
 - NIS surfactant is recommended, but not required
 - 1-acre pack with convenient 1,000 ft² measurement capability
