Introducing Fyfanon® EW Insecticide

The proven performance of Fyfanon ULV Mosquito Insecticide with reduced odor

Fyfanon EW Insecticide:
- Water-based emulsion. (Apply undiluted or diluted with water)
- Contains 40.9% (3.67 lbs. per gallon) malathion
- Low odor: contains odor-reducing technology
- Use rate: 0.03 to 0.06 lbs. malathion per acre
- Ideally suited for rotation with pyrethroid adulticides as part of your resistance management program
- Apply by vehicle-mounted, backpack or portable sprayers
- Available in 2 x 2.5-gallon containers and 30-gallon drums
- Proven formulation used internationally for many years
- Formulated to produce desired droplet size spectrum from standard ULV sprayers

FMC Corporation: Your Partner in Mosquito Control

FMC has been serving agricultural, industrial and consumer markets globally for more than a century with innovative solutions, applications and quality products. FMC's Fyfanon ULV Mosquito Insecticide and Fyfanon EW Insecticide are recommended by WHOPES (World Health Organization Pesticide Evaluation Scheme) for space spraying against mosquitoes. FMC partners with mosquito control professionals to promote environmental stewardship along with effective mosquito control.
