PRODUCT INFORMATION SUPPLEMENTAL LABEL

FOR USE IN ALABAMA, ARIZONA, ARKANSAS, CALIFORNIA, COLORADO, CONNECTICUT, WASHINGTON D.C., DELAWARE, FLORIDA, GEORGIA, HAWAI'I, IDAHO, ILLINOIS, INDIANA, IOWA, KANSAS, KENTUCKY, LOUISIANA, MAINE, MARYLAND, MASSACHUSETTS, MICHIGAN, MINNESOTA, MISSISSIPPI, MISSOURI, MONTANA, NEBRASKA, NEVADA, NEW HAMPSHIRE, NEW JERSEY, NEW MEXICO, NEW YORK, NORTH CAROLINA, NORTH DAKOTA, OHIO, OKLAHOMA, OREGON, PENNSYLVANIA, RHODE ISLAND, SOUTH CAROLINA, SOUTH DAKOTA, TENNESSEE, TEXAS, UTAH, VERMONT, VIRGINIA, WASHINGTON, WEST VIRGINIA, WISCONSIN AND WYOMING.

This label must be in the possession of the end use at the time of application. Read the label attached to the container of QuickSilver T&O Herbicide for complete Precautionary Statements and additional directions for use.

EPA Reg. No 279-3265 EPA Est. 279-

Active Ingredient: By Wt.
Carfentrazone-ethyl .............................................. 21.3%
Other Ingredients: .............................................. 78.7%
Total .............................................. 100.0%

This product contains 1.9 pounds active ingredient per gallon.

Contains Petroleum Distillates

KEEP OUT OF REACH OF CHILDREN

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. All applicable directions, restrictions and precautions on the EPA registered label are to be followed.

Before using QuickSilver T&O Herbicide as permitted according to this supplemental label, read and follow all applicable directions, restrictions and precautions on the label or attached to the pesticide product container. This Supplemental Labeling contains revised use instructions and/or restrictions that may be different from those that appear on the container label.

PRECAUTIONARY STATEMENTS

Hazards to Humans (and Domestic Animals)

CAUTION
Harmful if swallowed, absorbed through the skin or inhaled. Causes moderate eye irritation. Avoid breathing spray mist. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

See other panels for additional precautionary information.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION

QuickSilver T&O Herbicide is a contact herbicide with little or no residual activity that provides selective postemergence control of broadleaf weeds and silvery thread moss (Bryum argenteum) in turfgrass. The active ingredient of QuickSilver T&O Herbicide is carfentrazone-ethyl. It is an aryl triazolinone herbicide, which interrupts chlorophyll synthesis and produces metabolic byproducts that disrupt plant cell membranes. This process only occurs in susceptible green plants in the presence of light.

QuickSilver T&O Herbicide rapidly penetrates into the plant cells and symptoms may be apparent on foliage of susceptible weeds in 24 hours or less. Complete desiccation and death occurs within 7 to 14 days of application. QuickSilver T&O Herbicide is rainfast within one hour after application.

This product is most effective when applied to actively growing winter and summer annual seedlings. It also increases the speed of kill and expands the spectrum of control of mature and perennial broadleaf weeds (See "Weeds Controlled" section) when applied in a tank mixture with other postemergence herbicides.

Extremes in environmental conditions e.g. excessively high or low moisture or temperature may affect the activity of this product. Under warm, moist conditions appearance of herbicide symptoms may be accelerated while under very dry or cool conditions the expression of herbicidal symptoms is delayed. However, this product remains highly effective under both cool and warm environmental conditions. Weeds hardened by drought and/or extremely high temperatures are less susceptible to this product and the higher rates in the range are recommended under those conditions.

Active ingredient made in China, formulated and packaged in U.S.A.

FMC Corporation
Agricultural Products Group
Philadelphia PA 19103
**General Use Precautions**

Avoid spray drift onto non-target susceptible plants such as vegetables, flowers, ornamentals, trees, shrubs and other desirable plants. Do not apply this product to carpetgrass, dichondra, nor on lawns or turf where desirable croppers are present. Do not apply when conditions are conducive to spray drift or poor spray coverage. Do not apply more than 6.7 fluid ounces of product (0.10 lbs. a.i. of carfentrazone-ethyl) per acre by application or more than 0.40 lbs. a.i. of carfentrazone-ethyl per acre per season. The minimum retreatment interval for sequential broadcast applications of this product is two (2) weeks. Do not apply this product by aerial application. Do not apply this product through any type of irrigation system.

**Turfgrass and Sites**

QuickSilver T&O Herbicide is intended to be applied by lawn care operators, maintenance applicators, and service technicians for use in ornamental lawns and turfgrass, as well as stone-covered yards established in institutional, ornamental, and residential/domestic sites. Institutional sites are defined as turf areas and stone-covered yards around properties or facilities providing a service to public or private organizations including, but not limited to hospitals, nursing homes, schools, museums, libraries, sports facilities, golf courses, and office buildings. Ornamental sites include turfgrass and stone-covered yards established around residences, parks, streets, retail outlets, cemeteries, industrial buildings and institutional buildings. Residential/domestic sites are defined as areas associated with household or home life including, but not limited to apartment complexes, condominiums, and patient care areas of nursing homes, mental institutions, hospitals, or convalescent homes.

**Turfgrass Tolerance**

Turfgrasses tolerant to application of QuickSilver T&O Herbicide are listed below. FMC does not recommend application to turfgrasses not listed.

- **Cool Season Grasses** (creeping bentgrass, colonial bentgrass, annual bluegrass, Kentucky bluegrass, fine fescues, red fescues, tall fescue, perennial ryegrass)

  Established cool season grasses are generally tolerant to applications of QuickSilver T&O Herbicide at labeled rates. Tall fescue may exhibit a slight yellowing discoloration occurring within 3 to 5 days after application under some conditions. Recovery typically occurs within 4 to 7 days. If such injury or any injury cannot be tolerated, apply to a small test area before treating large areas to assure tolerance of the host turf species.

- **Warm Season Grasses** (common and hybrid bermudagrass, bahiagrass, buffalo grass, centipedegrass, seashore paspalum, St. Augustine grass, zoysiagrass)

  Established warm season grasses listed above are generally tolerant to applications of QuickSilver T&O Herbicide but may be susceptible to transitory yellowing when they are under stress. Stress is typically associated with but not limited to extreme high or low temperatures, Disease infection or insect infestation, extreme high or low moisture conditions, or transition into or out of dormancy.

  Under such conditions injury in the form of transitory yellowing discoloration may occur within 3 to 7 days of application. If such injury or any injury cannot be tolerated, apply QuickSilver T&O Herbicide in the manner you will be using it to a small test area before treating large areas to assure tolerance of the turf.

  Be aware of and observe all label restrictions regarding turf tolerance of companion products when QuickSilver T&O Herbicide is tank mixed with another product.

- **Newly Seeded, Sodded or Sprigged Turfgrasses**

  QuickSilver T&O Herbicide can be applied to the following species of turfgrass at 7 days or more after emergence for species established by both seeding and sprigging: hybrid bermudagrass, common bentgrass, St. Augustine, creeping bentgrass, tall fescue, perennial ryegrass and Kentucky bluegrass. Application to zoysiagrass should be delayed until at least 14 days after emergence to avoid extended discoloration. Slight discoloration may be observed immediately after application for hybrid bermudagrass, however, normal turf color returns by 12 days after emergence if no other stresses are present. Areas treated with QuickSilver T&O Herbicide may be seeded or overseeded one day following application.

- **Dormant Turf**

  Applications to dormant warm-season grasses are permitted. Avoid applications when warm-season grasses are transitioning into or out of dormancy.

**Mixing Instructions**

QuickSilver T&O Herbicide is an aqueous base emulsion containing 1.9 pounds active ingredient per gallon and is intended for dilution with water.
3. Drain the sprayer system. Rinse the tank with clean water and flush through the hoses and boom. Repeat the clean water rinse and flush. Remove and clean nozzles and screens in an ammonia solution separately.

Do not apply sprayer cleaning solutions or rinsate to any lawns, ornamentals, gardens or crops.

For more specific information on clean-out procedures contact FMC at 800-321-1362. Should small quantities of QuickSilver T&O Herbicide remain in mixing, loading and/or spray equipment that has been cleaned as described above, they may be released during subsequent applications potentially causing effects to non-target vegetation. FMC accepts no liability for adverse responses to non-target plants or crops.

**Weeds Controlled**

QuickSilver T&O Herbicide can be used to selectively control weeds including silvery thread moss anytime during the year except as instructed elsewhere in this label. Application rates for control of weeds other than silvery thread moss range from 0.9 to 2.1 fluid ounces per acre as described below. Use the lower rates in a range for susceptible weed species and for optimal environmental conditions. Use the higher rates in the range for dense infestations of perennial weeds, and for adverse/extreme environmental conditions. See “Category 2: Used as a stand-alone product for silvery thread moss control” to determine application rates for control of silvery thread moss.

**Category 1: Used as a stand-alone product**

Apply QuickSilver T&O Herbicide at rates of 1.0 to 2.1 fluid ounces of product per acre (0.023 to 0.048 fluid ounces per 1000 square feet) for control of seedling (4 inches tall or less) winter and summer annual weeds listed below:

<table>
<thead>
<tr>
<th>Annual morninggoy spp.</th>
<th>Annual sowthistle</th>
<th>Black medic</th>
<th>Carpetweed</th>
<th>Catchweed bedstraw</th>
<th>Coast fiddleneck</th>
<th>Common dayflower</th>
<th>Common lambquarters</th>
<th>Common mallow</th>
<th>Common purslane</th>
<th>Corn speedwell</th>
<th>Deadnettle spp.</th>
<th>Field pennycress</th>
<th>Field speedwell</th>
<th>Field violet</th>
<th>FL beggarweed</th>
<th>FL pusley</th>
<th>Hairy beggarricks</th>
</tr>
</thead>
</table>

**Category 2: Used as a stand-alone product for silvery thread moss control**

QuickSilver T&O Herbicide may be used for burndown and control of silvery thread moss (Bryum argenteum) occurring on golf course greens and tees consisting of bentgrass. To control silvery thread moss, apply QuickSilver T&O Herbicide at a rate 6.7 fluid ounces of product per acre (0.154 fluid ounces per 1000 square feet) followed by a second application in two weeks at a rate of 6.7 fluid ounces/acre.  

**Control over longer periods:**

If necessary, applications may be repeated every two weeks at a rate that is no less than 2.0 fluid ounces per acre (0.046 fluid ounces per 1000 square feet) and no more than 6.7 fluid ounces/acre to control moss that has reestablished, as long as the annual maximum rate of 0.40 lb a.i./acre per year is not exceeded.

Use a non-ionic surfactant in the spray mix at a rate of 0.25% volume/volume. Follow all adjuvant manufacturers use guidelines.

Do not tank mix with other pesticides for silvery thread moss control. Application to bentgrass turf that is under stress due to extreme high (>90°F) or low temperatures, disease infection, insect infestation or extreme high or low moisture conditions may cause transitory yellowing. Poa annua may be damaged at rates greater than 2.0 fluid ounces per acre.

Most creeping bentgrass varieties are tolerant to QuickSilver T&O Herbicide applications; however, not all varieties of creeping bentgrass have been fully evaluated. When applying QuickSilver T&O Herbicide to creeping bentgrass varieties other than Penncross or Crenshaw, it is recommended to first confirm tolerance by making an application to a small test area.

Cultural practices that favor the establishment of healthy bentgrass will also help to displace moss that is suppressed by the QuickSilver T&O Herbicide treatment.

**Category 3: Used in combinations with phenoxy-type post-emergence broadleaf herbicides**

Apply QuickSilver T&O Herbicide at rates of 0.9 to 1.5 fluid ounces of product per acre (0.021 to 0.034 fluid ounces per 1000 square feet) in tank-mix combinations with amine, esters, and salts of 2,4-D, dichlorprop, dicamba, mecoprop, MCPA and various combinations of these products for control of seedling and mature weeds listed in Category 1 plus the following:

- Canada thistle
- Carolina geranium
- Common chickweed
- Common groundsel
- Common ragweed
- Cutleaf eveningprimrose
- Dandelion
- Dollarweed
- Fleabane
- FL betony
- Ground ivy
- Hehall
- Henbit
- Horseweed (Conyza Canadensis)
- Lawn burweed

**Category 4: Used in combinations with other preemergence and postemergence herbicides registered for use in ornamental turf**

QuickSilver T&O Herbicide may be applied at rates of 0.9 to 1.7 fluid ounces of product per acre (0.02 to 0.04 fluid ounces per 1000 square feet) in tank-mix combinations with clopyralid, foramsulfuron, glufosinate, glyphosate, halosulfuron-methyl, imazaquin, metsulfuron, quinclorac and triclopyr for control of seedlings annuals listed under Category 1 and for temporary burndown of weeds listed in Category 3.  QuickSilver T&O Herbicide may be applied at rates of 0.9 to 1.7 fluid ounces of product per acre (0.02 to 0.04 fluid ounces per 1000 square feet) in a tank-mix combination with atrazine applied at 1.0 pounds of active ingredient per acre. Residual, long-term control of target weeds is as defined by the labeling of the companion product. For tank mixing with herbicides not listed above, follow the tank mix compatibility instructions under “Tank Mix Compatibility”.

**Category 5: Suppression**

QuickSilver T&O Herbicide may be applied at rates of 1.0 to 2.1 fluid ounces of product per acre (0.023 to 0.048 fluid ounces per 1000 square feet) for temporary burndown of weeds listed in Category 3.  QuickSilver T&O Herbicide may also be used for suppression and temporary burndown of algae (cyanobacteria) occurring in ornamental turf grasses and other landscape environments. Avoid spray drift onto desirable non-target susceptible plants such as vegetables, flowers, ornamentals, trees, shrubs.
