

allectus™

Take Control With Allectus™

New Allectus insecticide from Bayer Environmental Science offers an innovative new tool for insect control both above and below the ground. Choose from convenient liquid or granular formulations to fit your exact needs. Plus, Bayer offers the resources and technical assistance you need to incorporate Allectus into your existing insect control program.

For more information

To learn more about Allectus insect control above and below the surface, contact your local Bayer representative at 1-800-331-2867 or a FMC sales agent at 1-800-321-1362.

Allectus Insect Control for Midwest Lawns and Landscapes

Pests controlled

Allectus is the only product available to control all major surface feeding and subsurface insects, including:

- grubs
- sod webworms
- chinch bugs
- aphids
- fleas
- ticks
- billbugs
- and more

Application recommendations

Allectus is available in granular (Allectus G) formulation for home lawns and residential areas. Optimum control will be achieved when applications are made prior to egg hatch of target pest(s), followed by sufficient irrigation or rainfall to move the active ingredient through the thatch. Applications should not be made when turfgrass areas are waterlogged or when the soil is saturated with water.

Granular application

Apply at a broadcast rate of 100 to 125 pounds per acre (2.3 to 2.9 pounds per 1,000 square feet).

Liquid application

Allectus SC formulation is pending registration at USEPA.

Application timing

Because Allectus controls multiple insect stages, turf managers have a wide window of application for convenient management options. For optimum season-long control of pests above and below ground in the Midwest, make one application in June and a second application in August.

APPLICATION OPTIONS FOR ABOVE AND BELOW CONTROL

Application Rate	Number of Applications	Application Timing
100 – 125 lbs./acre	2	June & August
125 lbs./acre	1	June – August

Backed by Bayer means we're building on an already solid foundation of proven products to help you succeed. But you purchase more than products when you do business with Bayer Environmental Science. What you're buying is an added measure of confidence. It's the assurance that comes from value-added programs, services and an ongoing commitment to the industry.
